

# Real Office

Client meeting 1

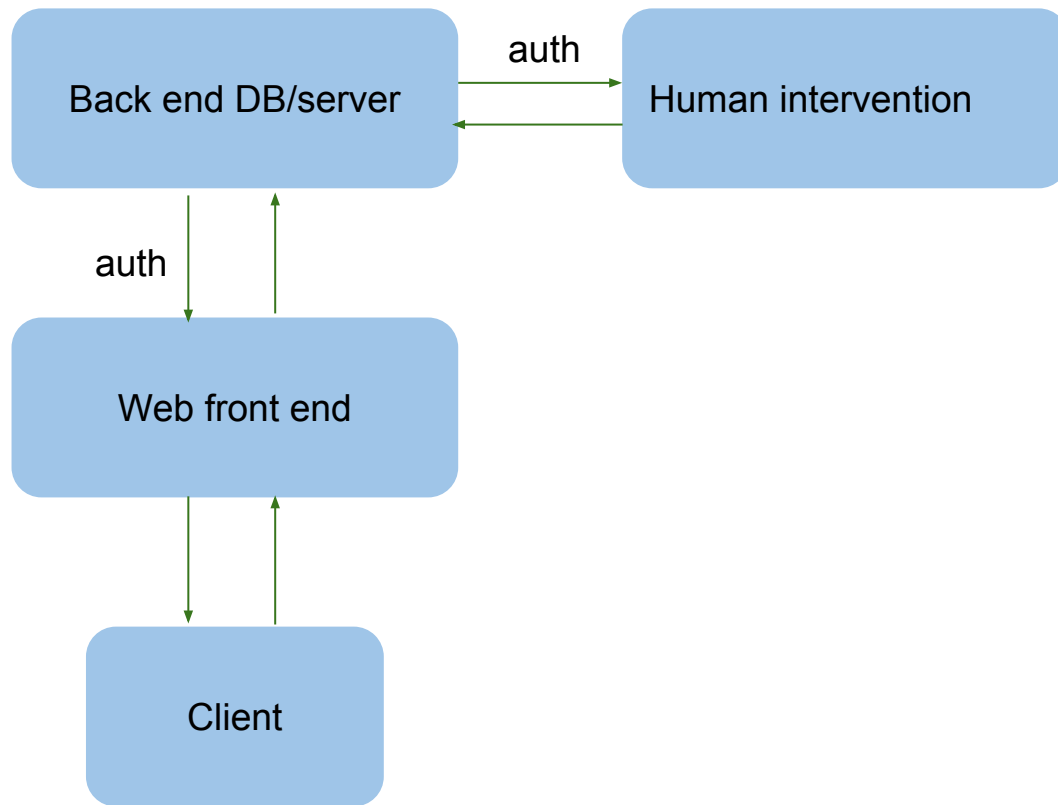

# The big picture

- **Automate** the activities of the the CSE department. This includes scheduling lectures, meetings, student activities, etc.
- **Track** resources within the department that are used for these activities.
- **Get updates** about various events happening at the CSE department.

# Stakeholders

- **CSE department staff:** Activities can be systematized, can keep track of all resources, smooth running of internal operations (ensure authentication), apply for leave/check status
- **CSE department students:** Can book venues, make requests for resources, can apply for no due form
- **Others:** Can view schedules, resource allocation, etc. Can probably make booking requests too.

# Control Flow

# Functional requirements

- Any CSE staff or students must be able to make bookings or requests in an authenticated manner
- It must be possible for them to also view schedules or resource allocation dynamically, give alerts appropriately
- Others?

# Other requirements

- Mobile integration?
- Integration with stationery stores, food supply, etc

Use cases

For next meeting
